## *Garden Tiles*

Jerome has plans to put a border of 1 square foot tiles around his  $10' \times 10'$  garden.

Some questions to answer . . .

1. How many tiles will he need to purchase? (Include your work)
2. Find at least four other ways to determine the answer.
3. Repeat steps (1) and (2) for a  $n \times n$  square garden.
