

Weekly Videos

You are responsible to view a video weekly for most meetings this semester. The videos are 10% of your grade and an easy way to earn points. They are a great way to discover statistics in the real world. They are **NO MAKEUPS** for any reason. You may view the videos in any of the following three ways:

(1) View the video before class from 6:00 - 6:30 pm in our classroom 18-319. Mr. Anderson will play the video for those that are able to make it. The video question sheet will not be required for those attending weekly classroom viewing. You will write a few comments and turn them in after the video. Doors will be locked at 6:00 pm sharp .

(2) View the video in the Learning Center. You have one week in which to complete the viewing and question sheet. Pick up the video tape and question sheet at the counter on the 2nd floor. Go to a viewing cubicle, view the video, and complete the question sheet. Turn the video and question sheet back in at the counter. Mr. Anderson will pick the question sheets up at 5:30 pm before the next class meeting.

(3) View the video on your computer at home or in the Learning Center. **YOU NEED A HIGH SPEED CONNECTION** and certain on line downloads to view video files. This may not work on your home computer. You will need to pick up the question sheet from Mr. Anderson in class and return it by the next class meeting. Again, **NO MAKEUPS** for any reason. These videos are available at: Learner.org

Choose: Mathematics ----> College/Adult

Choose: 'Against All Odds' (picture of Dr. Amabile)
