

Weekly Videos

You are responsible to view a video weekly for most meetings this semester. The videos are 10% of your grade and an easy way to earn points. They are a great way to discover statistics in the real world. There are **NO MAKEUPS** for any reason. You may view the videos in any of the following three ways:

(1) View the video before class from 5:30 - 6:00 pm in our classroom 21-100. Mr. Anderson will play the video for those that are able to make it. The *Video Question Sheet* will not be required for those attending weekly classroom viewing. You will write a few comments and turn them in after the video. Doors will be locked at 5:30 pm sharp .

(2) View the video in the Learning Center. You have one week in which to complete the viewing and turn in the *Video Question Sheet*. Pick up the video tape at the counter on the 2nd floor and go to a viewing cubicle, view the video, and complete the *Video Question Sheet*. OR view the video on one of the computers in the Learning Center (see instructions in #3 below) and complete the *Video Question Sheet*. Note: You will need to print the *Video Question Sheet* from the class website.

(3) View the video on your personal computer. YOU NEED A HIGH SPEED CONNECTION and certain on-line downloads to view video files. This may not work on your home computer. You will need to print the *Video Question Sheet* from the class website. Again, **NO MAKEUPS** for any reason. These videos are available at: Learner.org

Choose: Mathematics ----> College/Adult

Choose: 'Against All Odd' (picture of Dr. Amabile)
