1. Draw appropriate boxes to demostrate the given fraction addition, then add the fractions. Be sure to make each whole strip the same size, as well as making each piece within the whole the same size. You may need more than one whole for some of the answers.

$\frac{3}{8} + \frac{7}{8} + \frac{5}{8}$

2.
   - Estimate the sum by rounding each number to one significant digit before adding.
   - Find the actual sum.

$0.0567 + 0.1052 + 0.097$
