CurricUNET Steering Committee Meeting Notes

Friday, October 9, 2009

Present: Laura, Steve, Christine, Sharon, Maria, Jenny, Ada, Susan, Jing, and Eric

Steve commented the document sharing process is moving forward nicely. He stated that he was reviewing the documents, particularly the development forms, uploaded by the 3 colleges. He will develop an inventory of the uploaded documents and indicate what additional documents are needed before he shares it with Jing in a week. CSM will upload its process form soon.

Steve demo'd Ohlone's program review model and their inclusion of SLO features. He will send some screenshots for the portions that he wasn't able to demo. He will create a mock model based on Ohone's program review so that the 3 colleges can explore and tweak to serve San Mateo's program review needs.

Steve said that semester vs. annual data flexibility can be done in the program review module.

Sharon and Jenny from Cañada will attend the Ohlone CurricUNET Conference later this month. CSM and Skyline are undecided.

Next meeting via webinar is Oct 21, 3:30 – 4:30pm, webinar format. Jing and Steve will draft agenda.
