Project: RFP86706 – SMCCCD Construction Management Services for CIP3 Program

Subject:

Is there a possibility of smaller segments for construction management responsibilities outlined in the proposal?

A proposer asked if the District would be willing to split the construction management requirements for its CIP3 project into smaller segments encompassing one or more single projects in order to allow smaller firms who do not have the required college bond program experience to participate.

District Response: Due to the size and complexity of its \$388M CIP3 program, the District is looking to firms with the capacity and experience to manage the entire project and will not consider other options. Smaller firms are encouraged to review the District's website for other opportunities that may be more suited to smaller firms.
